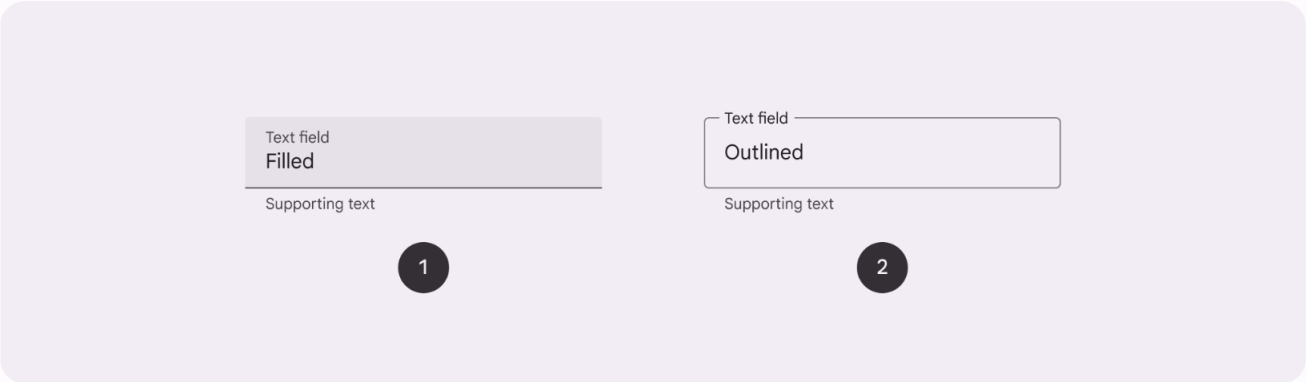
Text fields

Text fields let users enter text into a UI

Resources +2

- Make sure text fields look interactive
- Two variants: filled and outlined
- The text field's state (blank, with input, error, etc) should be visible at a glance
- Keep labels and error messages brief and easy to act on
- Text fields commonly appear in forms and dialogs

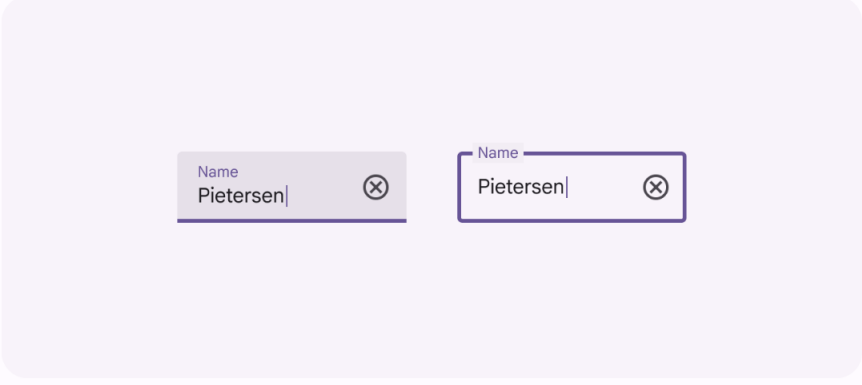


1 Filled text field

2 Outlined text field

Differences from M2

- Color: New color mappings and compatibility with dynamic color



Text fields have new color mappings
