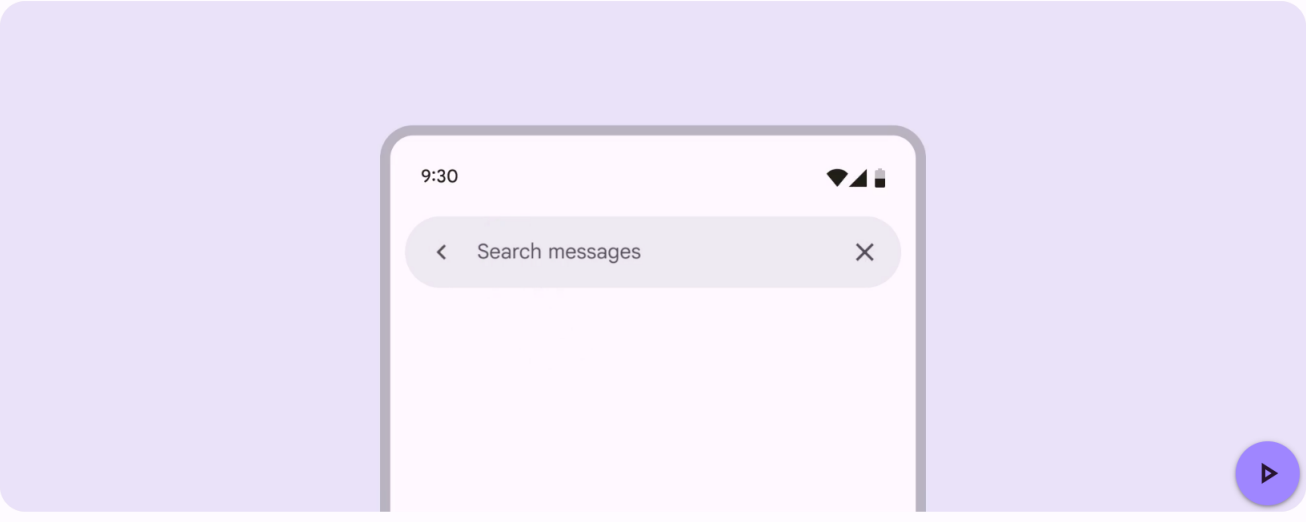
# Search

Search lets people enter a keyword or phrase to get relevant information

Resources +2

- Use search for navigating a product with queries
- A search bar can include a leading search icon, hinted search text, and optional trailing icons
- Search can display suggested keywords or phrases as a person types
- A search bar displays search suggestions or results in a list
- Use a search app bar to provide an emphasized, global entry-point



When inputting text, search suggestions or results appear below the search bar

# M3 Expressive update

Search has a new visual style, motion, and more flexibility for trailing icons. More on M3 Expressive

**February 2025**

Naming

- Search bar and search view are now collectively named **search**

Configurations

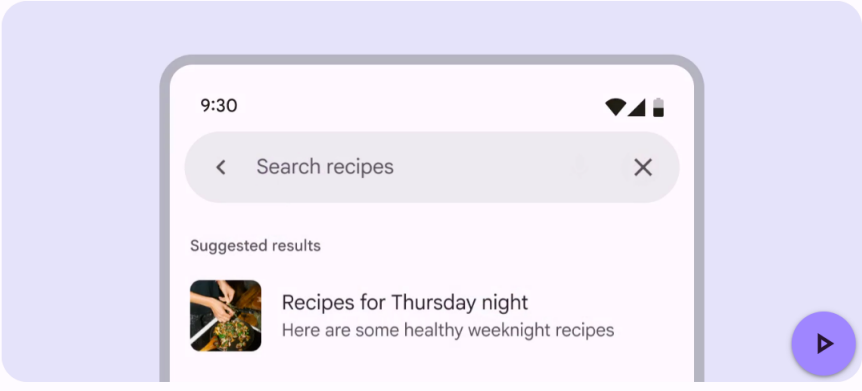
- Styles: Search can be contained (recommended) or divided
- Gaps can separate results into groups

Motion

- The search bar grows wider when focused

Supported platforms:

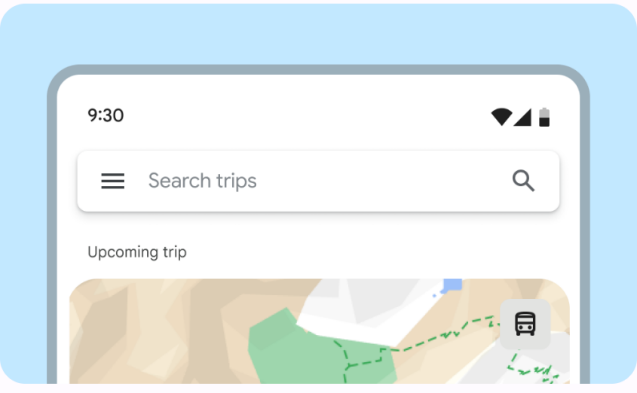
- Jetpack Compose



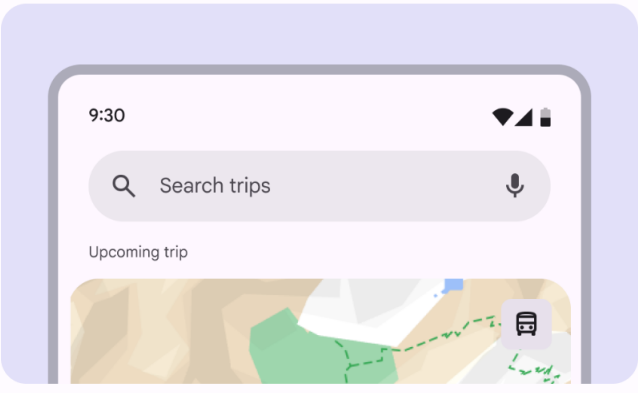
The **contained** search style features a persistent, filled search container

# Differences from M2 to M3 baseline

- Color: New color mappings and compatibility with dynamic color
- Elevation: Lower elevation and no shadow by default
- Name: Search was formerly known as open search bar
- Variants: Two official variants of search components: search bar and search view



M2 open search bars were square and elevated



M3 search bars are rounded, use tonal surface, and support dynamic color
