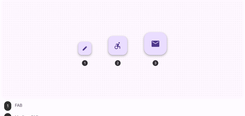
FAB

Floating action buttons (FABs) help people take primary actions

Resources: v4

Variants



1. FAB
2. Medium FAB
3. Large FAB

Baseline variants

The small FAB is still available, but no longer recommended. Jump to baseline specs

1. Small FAB

Variant	M3	M3 Expressive
FAB	Available	Available
Medium FAB	--	Available
Large FAB	Available	Available
Small FAB	Available	Not recommended. Use a larger size.

Configurations

In the expressive update, the **primary**, **secondary**, and **tertiary** set colors were renamed to **primary container**, **secondary container**, and **tertiary container** to match the actual color roles used. New primary, secondary, and tertiary color styles were created to match the corresponding color roles. View details in the color styles section

Category	Configuration	M3	M3 Expressive
Color	Primary container, secondary container, tertiary container	Available as primary, secondary, tertiary	Available
	Primary, secondary, tertiary	--	Available

Tokens & specs

Use the table's menu to select a token set. FAB tokens are organized by size and color. Learn more about design tokens

FAB - Size - Large

Search

Token		Value
FAB large container height	md.comp.fab.large.container.height	96dp
FAB large container width	md.comp.fab.large.container.width	96dp
FAB large icon size	md.comp.fab.large.icon.size	36dp
FAB large container shape	md.comp.fab.large.container.shape	

Anatomy

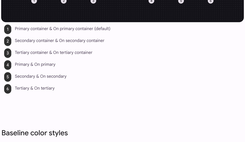
1. Container
2. Icon

Color

Color values are implemented through design tokens. For design, this means working with color values that correspond with tokens. In implementation, a color value will be a token that references a value. Learn more about design tokens

Color styles

FABs can use several combinations of **color** and **on-color** styles, such as **primary** and **on-primary**. The following color mappings provide the same legibility and functionality, so the color mapping you use depends on style alone.



1. Primary container & On primary container (default)
2. Secondary container & On secondary container
3. Tertiary container & On tertiary container
4. Primary & On primary
5. Secondary & On secondary
6. Tertiary & On tertiary

Baseline color styles

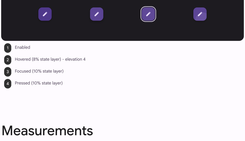
Surface FAB color styles are still available, but no longer recommended.

1. Surface FABs

States

States are visual representations used to communicate the status of a component or interactive element.

When using a non-default color mapping for FABs, make sure the state layer color is the same as the icon color. For example, the state layer color for the **primary** color style should be md.sys.color.primary.



1. Enabled
2. Hovered (8% state layer) – elevation 4
3. Focused (10% state layer)
4. Pressed (10% state layer)
