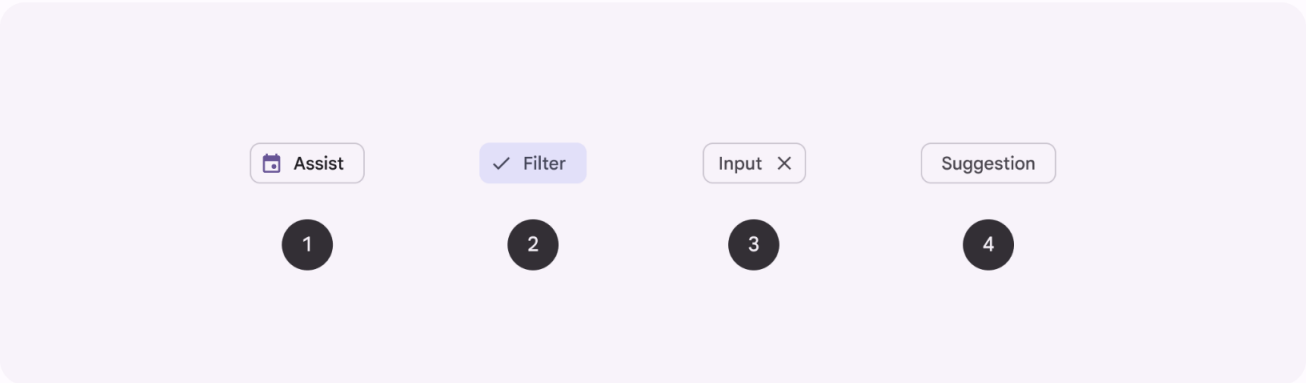
Chips

Chips help people enter information, make selections, filter content, or trigger actions

Resources +2

- Use chips to show options for a specific context
- Four variants: assist, filter, input, and suggestion
- Chip elevation defaults to 0 but can be elevated if they need more visual separation

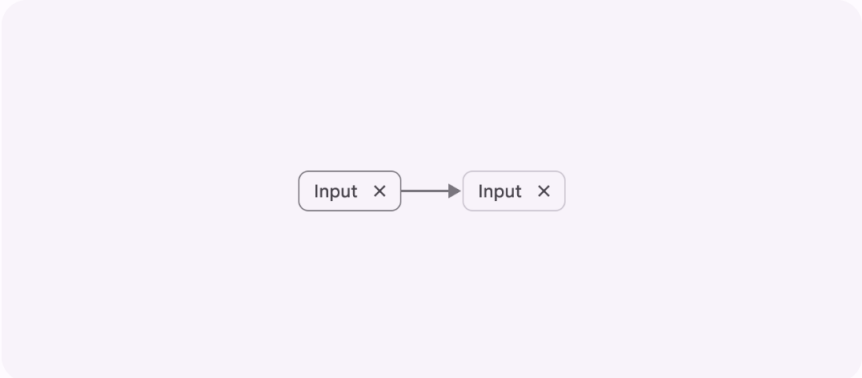


1. Assist chip
2. Filter chip
3. Input chip
4. Suggestion chip

Updates

Aug 2024

Updated stroke color from **outline** to **outline variant**.



The stroke color was softened to improve visual hierarchy between chips and buttons

Differences from M2

- Color: New color mappings and compatibility with dynamic color
- Shape: Rounded rectangle
- Variants: Action chips have been separated into assist chips and suggestion chips. Choice chips are now a subset of filter chips

M2: Variants of chips are input, choice, filter, and action chips

M3: Variants of chips updated to assist, filter, input, and suggestion chips
