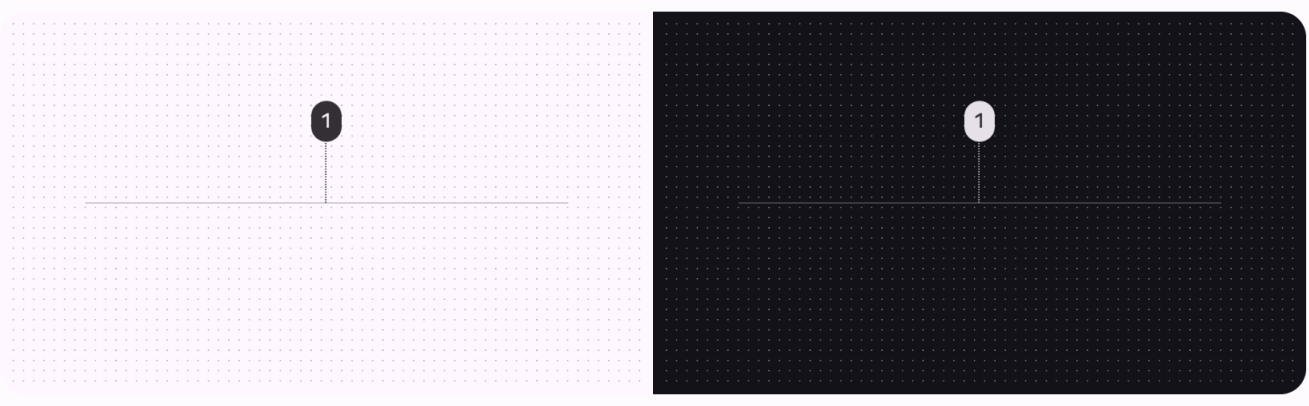
Token		Default, Light
Enabled		
Enabled / Container		
Divider thickness	md.comp.divider.thickness	1dp
Divider color	md.comp.divider.color	#CAC4D0

Color

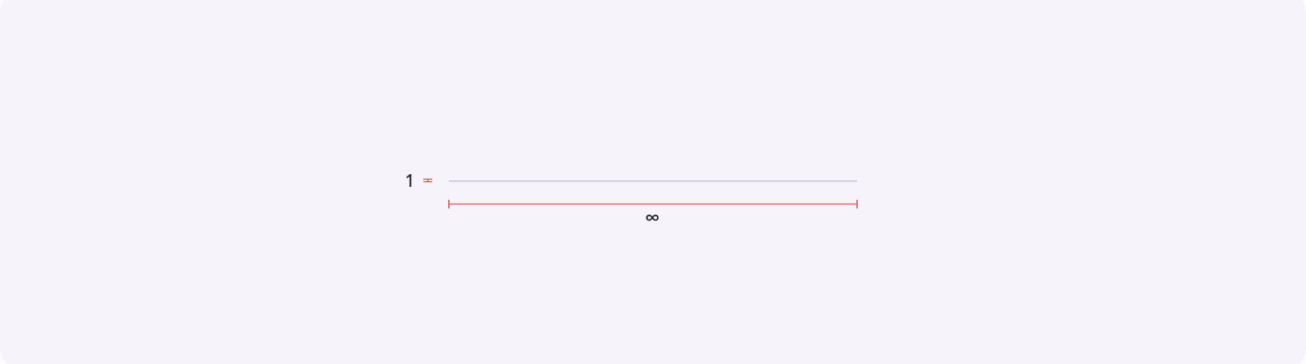
Color values are implemented through design tokens. For design, this means working with color values that correspond with tokens. For implementation, a color value will be a token that references a value. Learn more about design tokens



Divider color roles used for light and dark schemes:

1 Outline variant

Measurements



Measurements

Attribute	Value
Divider full-width	100%
Divider inset left margin	16dp
