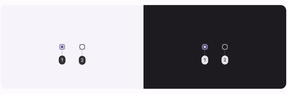
Radio button unselected focus state layer opacity	...unselected.focus.state-layer.opacity	0.1
Focused / Icon		
Radio button selected focus icon color	...adio-button.selected.focus.icon.color	#a750A4
Radio button unselected focus icon color	...io-button.unselected.focus.icon.color	#1D1B20
Pressed (ripple)		
Pressed (ripple) / State layer		
Radio button selected pressed state layer color	...on.selected.pressed.state-layer.color	#1D1B20
Radio button selected pressed state layer opacity	...selected.pressed.state-layer.opacity	0.1
Radio button unselected pressed state layer color	...unselected.pressed.state-layer.color	#a750A4
Radio button unselected pressed state layer opacity	...nselected.pressed.state-layer.opacity	0.1
Pressed (ripple) / Icon		
Radio button selected pressed icon color	...io-button.selected.pressed.icon.color	#a750A4
Radio button unselected pressed icon color	...button.unselected.pressed.icon.color	#1D1B20

Color

Color values are implemented through design tokens. For design, this means working with color values that correspond with tokens. For implementation, a color value will be a token that references a value.
Learn more about design tokens



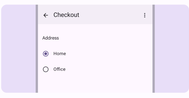
Radio button color roles used for light and dark themes:

1 Primary

2 On surface variant

Adjacent text label color

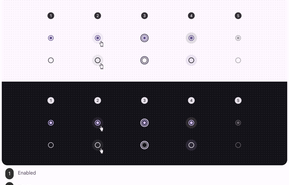
Use the color role **on surface** for adjacent text labels. This remains the same even if interacting with the label or component.



The text color remains the same regardless if the button is selected or not

States

States are visual representations used to communicate the status of a component or interactive element.
Learn more about interaction states



1 Enabled

2 Hover

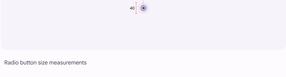
3 Focus

4 Pressed

5 Disabled

State specs are in the token module above

Measurements



Radio button size measurements

Attribute	Value
Icon size	20dp
State layer size	40dp
Target size	48dp
