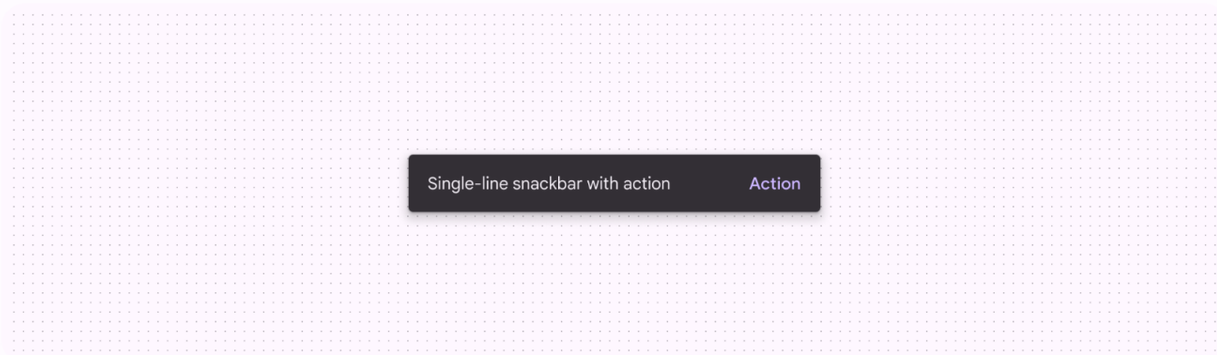
Snackbar

Snackbars show short updates about app processes at the bottom of the screen

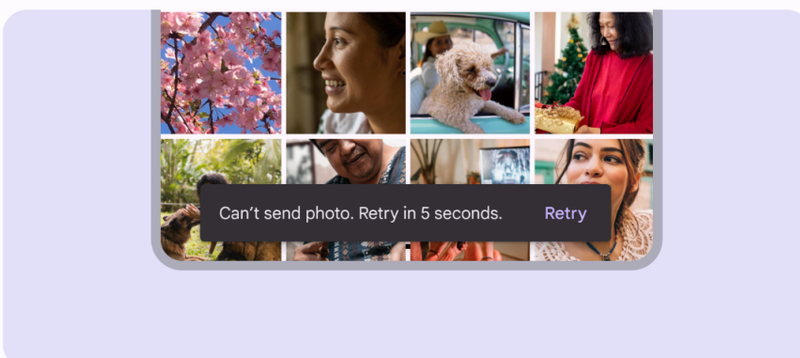
Resources

- Snackbars shouldn't interrupt the user's experience
- Usually appear at the bottom of the UI
- Can disappear on their own or remain on screen until the user takes action



Differences from M2

- Color: New color mappings and compatibility with dynamic color
- Behavior: Clarified that snackbars can either appear temporarily (dismissive) or persist until the user takes an action (non-dismissive)



Snackbars have new color mappings
