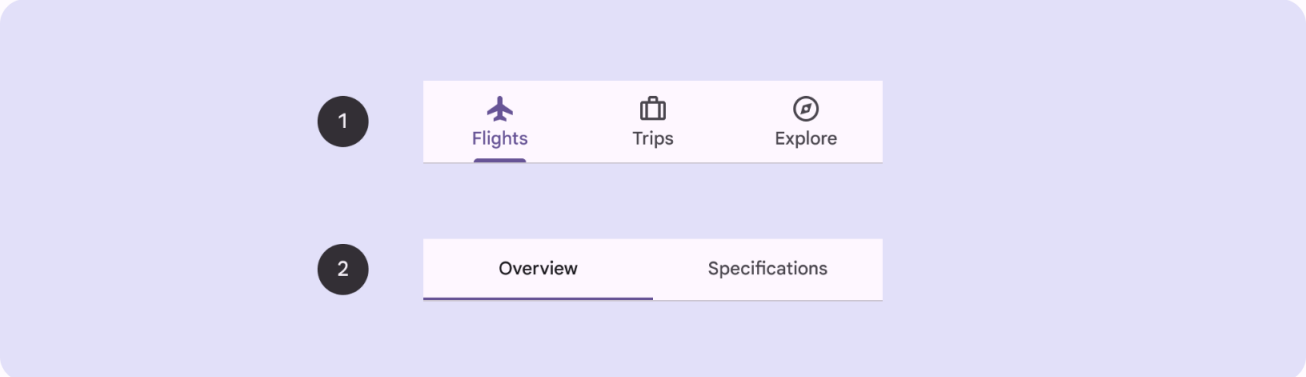
Tabs

Tabs organize content across different screens and views

Resources +2

- Use tabs to group content into helpful categories
- Two variants: primary and secondary
- Tabs can horizontally scroll, so a UI can have as many tabs as needed
- Place tabs next to each other as peers

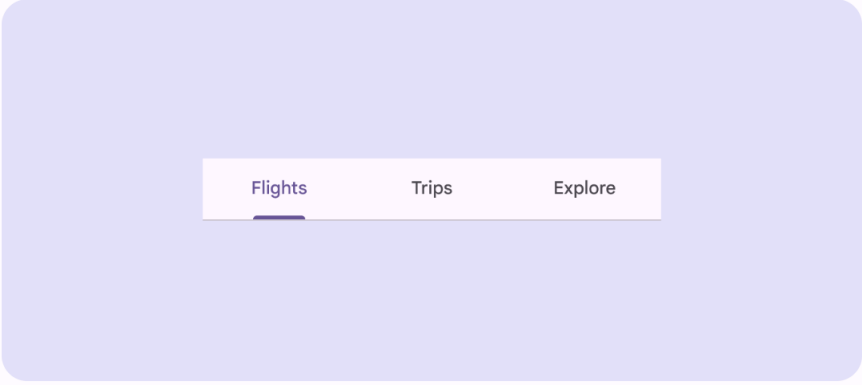


1 Primary tabs

2 Secondary tabs

Differences from M2

- Color: New color mappings and compatibility with dynamic color
- Layout: Icons and labels are now vertically centered within the container



Tab icons and labels are positioned in the vertical center of the container
