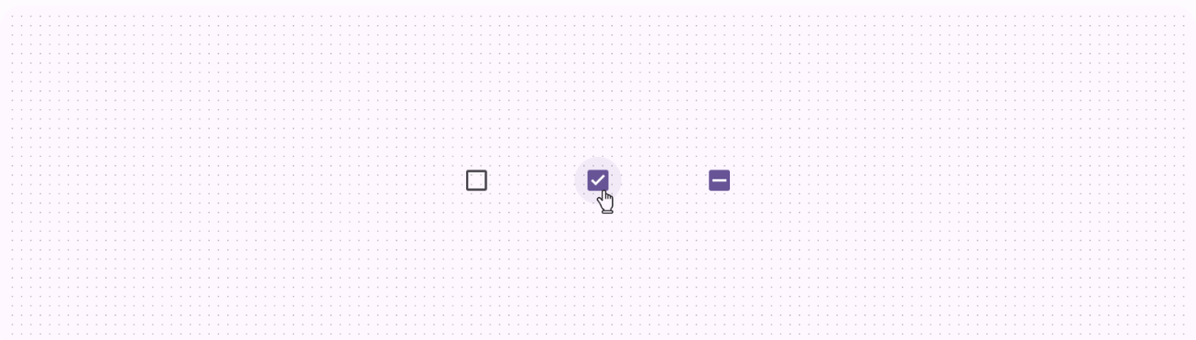
Checkbox

Checkboxes let users select one or more items from a list, or turn an item on or off

Resources +2

- Use checkboxes (instead of switches or radio buttons) if multiple options can be selected from a list
- Label should be scannable
- Selected items are more prominent than unselected items



Unselected, selected (hover), and indeterminate checkboxes

Differences from M2

- Color: New color mappings and compatibility with dynamic color
- States: New indeterminate states as well as error states for unselected, selected, and indeterminate
